

## Justice and Emergency Services Programme

The JES Programme represents the supplier community that operates in the public safety, criminal justice, and blue light markets. The Programme aims to create strong relationships between members and public sector customers by creating forums to encourage industry engagement, unlock innovation, explore emerging technology and interrogate challenges to digital transformation.

### **Our focus, activities and projects to be undertaken in 2025:**

- Support the Government in delivering the 'Safer Streets' mission by driving digital transformation for greater efficiency and improved service delivery.
- Ensure techUK is seen as the go-to partner for pre-procurement market engagement, horizon scanning and as the body for law enforcement, public safety and justice agencies to communicate their challenges to the sector.
- Leverage the newly established Interoperability in Justice and Public Safety Forum to create a collaborative platform that unites industry and partners in addressing the most critical technical challenges to information sharing across the public safety and justice landscape.
- Collaborate with policing, fire & rescue, and justice stakeholders to advance national digital strategies by facilitating member-led forums and working groups for meaningful engagement.

## Programme Value Proposition

### Industry Access

techUK provides members with invaluable opportunities for industry engagement with justice and public safety stakeholders, across the National Fire Chiefs Council (NFCC), Ministry of Justice, its arm's length bodies, local forces and national policing bodies including the National Police Chiefs' Council (NPCC), Office of the Police Chief Scientific Advisor and Police Digital Service. techUK members are at the forefront of the digital step-change across Justice and Emergency Services.

### Influence Policy

techUK members join an active community of suppliers shaping justice and public safety policy in the UK. Members are central in the debate on emerging technologies, engaging at a strategic level around their lawful and ethical adoption. We respond to consultations and work with policy teams across the Ministry of Justice, His Majesty's Prison and Probation Services, the Home Office, and College of Policing.

### Inside Track

techUK drives innovation across fire, policing, and justice, aligning with the Home Office Police and Public Protection Technology priorities and Justice Digital to deliver public safety services. Our relationships with the commercial teams from the Ministry of Justice, Police Digital Service, and Blue Light Commercial means that members are among the first to hear about upcoming opportunities, contract expiries and market insight.

### Impact Performance

techUK prides itself on helping members to network with industry stakeholders. We run pitching and speed dating events to help SMEs to deliver elevator pitches to larger companies in the Justice and Emergency Services market, and all members have opportunities to participate in member-led working groups and forums to drive change and help tackle challenges facing the sector. These opportunities help members build better strategies for the future.

### Return on Investment

techUK conveys the powerful voice of the sector to senior public sector stakeholders, ensuring industry is heard, and creating a platform for collaboration. We engage at a senior level across Government and, with members, support the delivery of large-scale digital change programmes. We foster relationships between supplier and customer, helping members to foster relationships critical to their growth.
