

Cyber Resilience Programme

Cyber resilience underpins technologies we increasingly rely upon, driving growth of the global digital economy. techUK creates a channel for industry to engage with commercial and government partners, promoting growth in the adoption of cyber technologies and services across key sectors in the UK and internationally.

The programme provides a platform for engagement between industry and government on cyber resilience policy interventions and supports broader initiatives to grow the cyber sector.

Our focus, activities and projects to be undertaken in 2025:

- Facilitating strategic briefings with government, providing members with valuable insights and opportunities to influence key policy issues, including the Cyber Security and Resilience Bill.
- Delivering sector specific events with key stakeholders, industry specific trade and regulatory bodies to understand key challenges and opportunities, connecting cyber members together with industry counterparts.
- Championing the cyber ecosystem by advocating for SMEs, building partnerships with stakeholders across regions and nations and spotlighting initiatives that enhance skills, innovation, and diversity within the sector.

Programme Value Proposition

Industry Access

Our Cyber Resilience Programme offers members working across the UK cyber ecosystem the opportunity to network, share ideas and collaborate, enabling the industry as a whole to address common challenges and opportunities together. The Programme holds market engagement sessions across public and private sectors and the exports market, providing industry with market intelligence and practical advice on how to engage key partners.

Influence Policy

techUK champions industry perspectives on the development of key legislation and regulation. We have high-level relationships with key government departments including DSIT, Cabinet Office, NCSC and Home Office, and we provide the secretariat for the Cyber Growth Partnership, the industry–government conduit for growing the sector. These initiatives help members to create the best environment for growth.

Inside Track

techUK continues to explore how industry can strengthen the role it plays in delivering the National Cyber Strategy and Government Cyber Security Strategy. We run market engagement events to explore key markets across CNI and 4IR. We also work with DBT to engage key international partners across the 5-Eyes, Gulf and emerging economies. This approach helps members to understand the opportunities in the sector.

Impact Performance

Our market engagement activities ensure that members are well prepared to take advantage of business opportunities across the cyber resilience and security sector which lead to successful business outcomes. Our policy work helps to shape a positive regulatory and legislative environment across the cyber sector for technology companies, ensuring their voices are heard in government and by senior policy makers.

Return on Investment

techUK helps members to understand the current and future regulatory environment for cyber, helping to reduce business risks and costs. For any company looking to engage in UK cyber, we provide market intelligence and insight and are a conduit for engagement with key stakeholders. techUK members can better navigate the UK cyber ecosystem, make better decisions and embrace key opportunities.
