Cluster 3 activity

- Continuing with workshops and research on spectrum sharing
- Three workshops held:
    - Workshop 1 held on 18 June 2021 looked at 5G services / use cases and their spectrum requirements
    - Workshop 2 held on 26 August primarily considered Ofcom's Shared Access and Local Access licensing schemes
    - Workshop 3 held on 29 September considered future spectrum sharing requirements including the need for DSA
- Good input to all three workshops, which has provided useful evidence for DCMS
- Worked with Cluster 1 on future spectrum capacity demand (focus on rural)
- Future work planned on RED (jointly with techUK) – next Wednesday morning, 27 October – 10:00-12:00

Next steps with sharing work

- Synthesise outputs from the 3 workshops
- Complete interviews with interested stakeholders
- Draft report for DCMS shortly
- Comment and approval stage
